PART I - STATEMENT OF WORK

A. *OBJECTIVE*

The Town of Lauderdale-By-The-Sea is a seaside community with a permanent population of about 6,000 that increases to about 9,000 during the winter season.

The Town operates a LAN (Local Area Network) that serves 19 employees. Additionally, there are certain on-site vendors that connect to the Internet via the Town's network. The Town is seeking proposals from qualified vendors to maintain the Town's network, set-up and configure new computers / peripherals, and to provide required end-user support.

B. *GENERAL INFORMATION ABOUT THE TOWN'S IT INFRASTRUCTURE AND SUPPORT NEEDS.*

The LAN sits behind a firewall (SonicWall TZ 200). There are a total of three servers on the LAN as follows:

- Clerk-SBS Server / Domain controller: Windows Small Business Server 2011 Standard Service Pack 1 and Microsoft Active Directory version: 6.1.7601.17514.
- Finance Server Microsoft Windows Server 2003 Standard Edition SP2.
- Development Server: Microsoft Windows Server 2003 R2 Standard Edition SP2.

The on-site vendors referenced above are generally set-up as Workgroups on the Town's network (rather than on the Town's Domain). These vendors include: Community Center, CAP Government, Republic Parking, and Calvin Giordano.

The Town does full system back-ups of the Domain controller to a Synology Diskstation Networked Attached Storage Device (NAS). The Town does daily file back-ups of all three servers via eSilo's online backup service. The Town's email correspondence is routed through a Barracuda Message Archiver 150, which acts as a backup device for email correspondence.

The Town has a broadband internet connection through Comcast with 50 mps download speed and 10 mps upload speed. This connection is used for general email connectivity as well as uploading the Town meetings to an external service (i.e., SIRE). The Town has a second dedicated line with the same specifications that's only used to broadcast video and audio of the Town's meetings via U-Verse. The Town also has a T1 connection through Windstream that's used for the VOIP phone system and as a failover in the event that there's a problem with the Comcast internet service.

Key applications include the Finance System (Tyler Technologies Fund Balance), the Document Management System (Laserfiche), Business Tax Manager, and the Webcasting system (SIRE).
